CABLESAFE® SAFETY HOOKS

MAKE YOUR WORK ENVIRONMENT SAFER

Using these CableSafe® Safety Hooks makes it extremely easy to suspend cables, electrical wires, hoses, and other work lines. They contribute to improved accessibility by clearing the work floor, and greatly reducing tripping hazards. First introduced in Europe in 1994, these hooks have been used successfully in many plant construction, turnaround, and maintenance situations.

EASY, ONE-HANDED USAGE

The hooks can be used in place of ropes, lashing, or plastic tie wraps which can often be cumbersome and require at least 2 (or more) hands to lift and secure the cables and hoses. Simply position the hook, and then lift the work lines into place. A hole in each end of the hook enables the user to easily secure the load on the safety hook by means of a tie wrap.

TOUGH, STRONG CONSTRUCTION

The Safety Hooks are available in 3 sizes – designated as 6", 9" and 12". As the size increases, so does the diameter of the hooks and the maximum load bearing capacity up to 220 pounds (100 kg). **NOTE:** The hooks are not for lifting.

EXCELLENT TEMPERATURE RESISTANCE

All CableSafe® Safety Hooks are molded from a glass reinforced polyester material that can withstand temperatures from - 4° F. (- 20° C.) up to 392° F. (200° C.). For easy recognition, the parts are colored throughout with high-visibility safety yellow.

PROTECTION FOR YEARS AND YEARS

The molded plastic does not damage your paintwork or cut or puncture your cables. The hooks can be used over and over again. These CableSafe® Safety Hooks do the job neatly and are strong enough to hold your wires, cables, and hoses safely off the ground for a better workplace.

BEAM CLAMPS FOR CABLESAFE® SAFETY HOOKS

USE ON BEAMS, PURLINS, CHANNEL AND ANGLE IRON

These Beam Clamps make it easy to hang the CableSafe® Safety Hooks under mezzanines and along beams or in other smooth surface areas where you want to suspend cables, electrical wires, hoses, and other work lines.

MAKE TURNAROUNDS & MAINTENANCE SAFER

Use of the clamps and safety hooks can greatly contribute to improved accessibility by clearing the work floor, and reducing tripping hazards. The clamps and hooks can be used throughout the plant in many construction, turnaround, and maintenance situations.

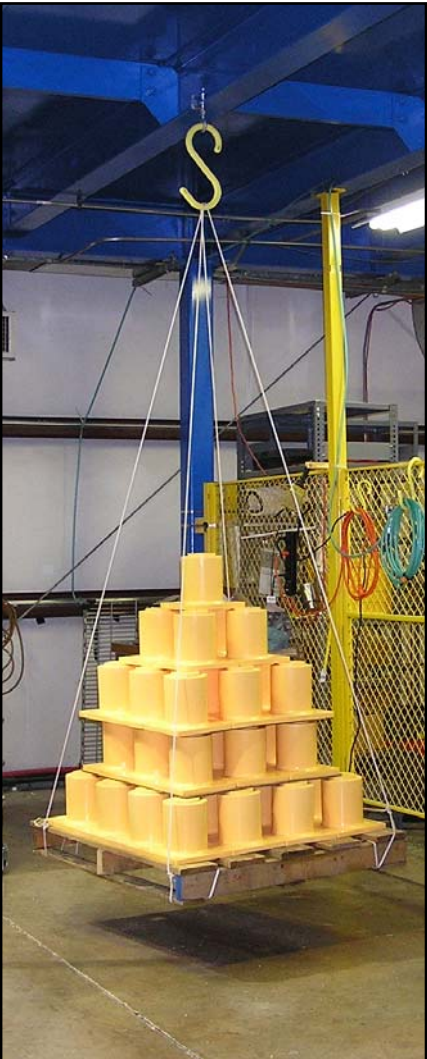

SOLID CONSTRUCTION, FORGED EYEBOLT

This one-size-fits-all Beam Clamp can be used to hang any of the 3 sizes of CableSafe® Safety Hooks – 6”, 9” and 12”. The hot-dip galvanized clamps and eyebolts provide corrosion resistance for many plant situations.

SECURE AND STRONG

Each clamp will hold up to 500 lbs. which should exceed any loads of suspended cables, wires, hoses or work lines hanging from them. A locking nut ensures that the clamp will grip the beam securely. The eyebolt also has a locking nut, which allows it to be positioned in any direction, and then locked in place. The clamps are easy to use and can be repositioned at any time.

Qty Pricing	Each box contains 25 beam clamps	Beam Clamps (One Size Fits ALL HOOKS)	
	Shipping Weight 21 lbs.	1-2 boxes	\$185 (\$7.40)
	(Safety Hooks are sold separately.)	3-6 boxes	\$170 (\$6.80)
		7-12 boxes	\$155 (\$6.20)
		13+ boxes	\$145 (\$5.80)

Less than Box Quantity	\$ 8.50
